Top Skills

Software Infrastructure
Production Deployment
Amazon Web Services (AWS)

Certifications

Python Foundation
JavaScript Essentials 1
Introduction to Cybersecurity
Intermediate JavaScript

Fhatuwani Brighton Mulaudzi

Software Engineer || AWS DevOps Engineer || AI & Automation Developer
Pretoria Metropolitan Area

Summary

I’m a Software Engineer with hands-on experience building, deploying, and maintaining full-stack applications, with a growing focus on DevOps, cloud engineering, and AI-powered systems.My development experience spans both front-end and back-end technologies, including JavaScript, TypeScript, Node.js, Express.js, Angular, React, Next.js, Java, Spring Boot, and RESTful API development. I have worked with relational databases such as MySQL, MariaDB, and PostgreSQL, using technologies such as JPA and Hibernate to design and manage data-driven applications.Beyond application development, I have practical experience with DevOps and cloud technologies, including AWS, Docker, CI/CD pipelines, Jenkins, Bitbucket Pipelines, Linux, Git, and infrastructure automation. I enjoy working across the software delivery lifecycle—from designing and developing applications to containerizing, deploying, monitoring, and troubleshooting them.I’m also expanding my expertise in enterprise and distributed systems, including microservices, Apache Camel, API integration, design patterns, automated testing, and event-driven architectures. Alongside this, I’m developing skills in AI engineering and automation, with an interest in building intelligent systems and integrating AI capabilities into real-world software and cloud platforms.I care about writing clean, maintainable code, understanding how systems work beyond the application layer, and continuously improving the reliability, scalability, security, and automation of the software I build.My long-term focus is becoming an engineer who can bridge software development, cloud infrastructure, DevOps, and AI—building systems that are not only functional, but scalable, automated, secure, and production-ready.I’m always open to connecting with engineers, technology teams, and organizations working on challenging software, cloud, DevOps, and AI projects.

Experience

Duranki
DevOps Engineer
June 2025 - Present (1 year 5 months)

Heybassh
Web Developer
November 2024 - February 2025 (4 months)

Growit Management Consulting
Web Designer & Developer
February 2024 - June 2024 (5 months)

Education

CodeSpace Academy
Certificate, Software Development · (June 2023 - December 2023)

University of Venda
Bachelor of Science · (2018 - 2021)

Maligana Wilson Secondary School
National Senior Certificate, Physical Sciences · (December 2013 - December 2017)

Phinimini primary School
· (December 2005 - December 2012)
